Vidicy

AI document review for visa agencies

Taki Tajwaruzzaman Khan
Team lead

Tanjim Ashraf
Team member

Visa document review is still manual

Agency staff check each file, compare details and follow up with clients.

Missing documents

A required document or page is absent.

Unclear scans

Important details are hard to read.

Conflicting details

Names, dates or amounts do not match.

Agency interviews shaped Vidicy

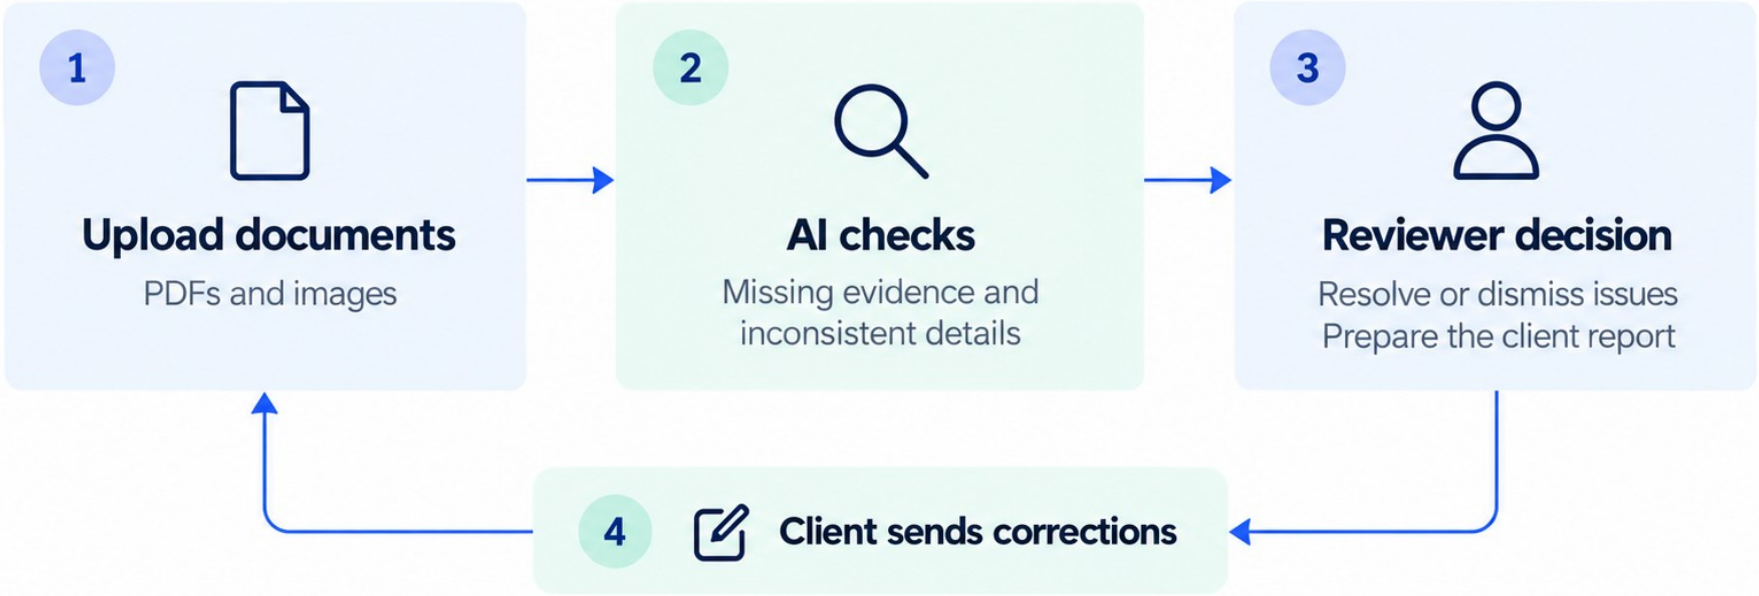

15
visa and travel agencies

113
travelers in 12 countries

Agencies described
manual review as their main bottleneck.

How agencies review a case

The agency creates a case and selects the visa route. Vidicy generates the document checklist.

Core features for agency teams

Case queue

Track status, priority and reviewer ownership.

Document checklist

See required files and upload progress.

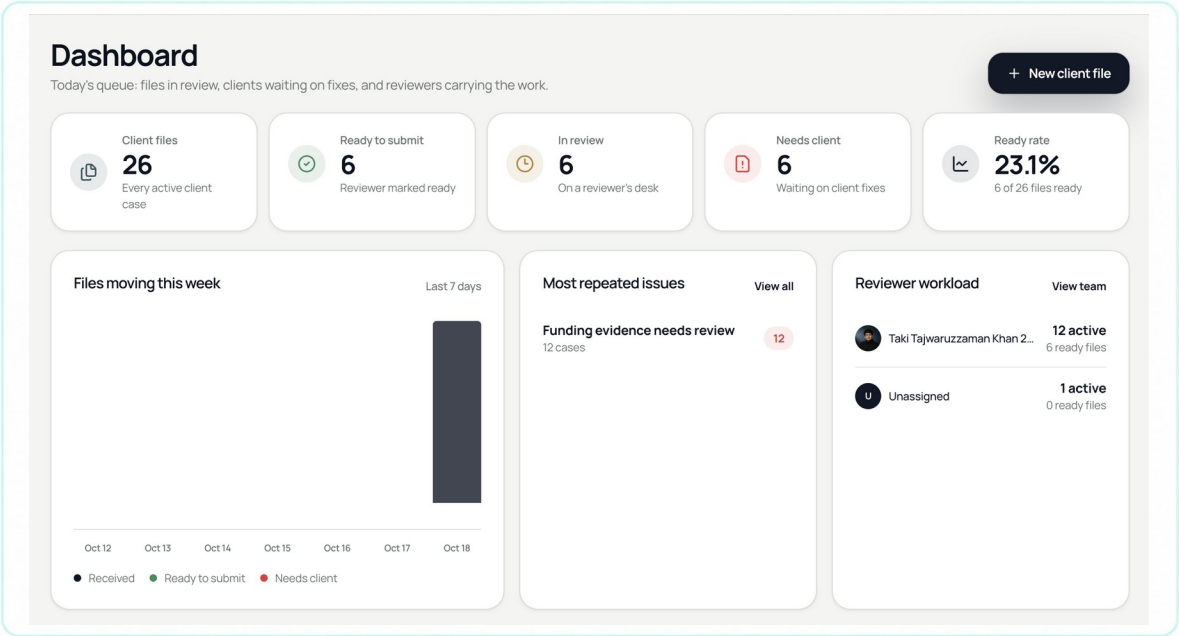

Review issues

Resolve or dismiss findings before client follow-up.

Team workload

See assigned cases and the staff handling them.

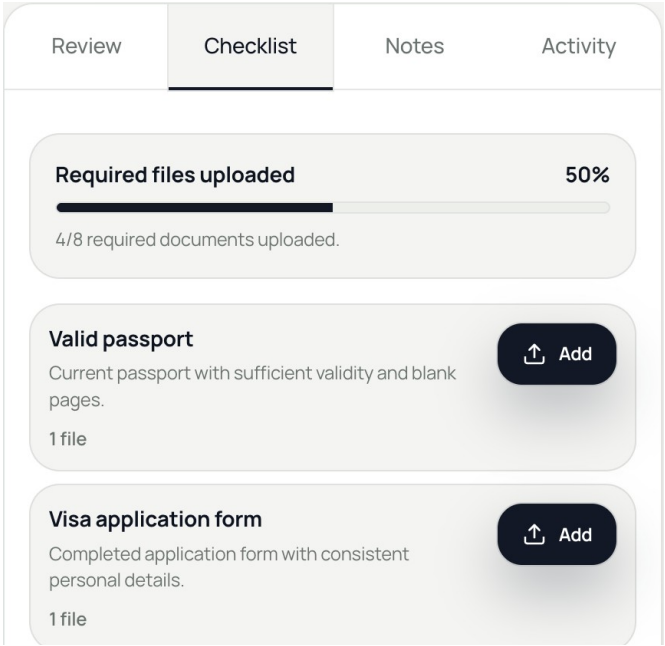

Prototype dashboard (demo data)

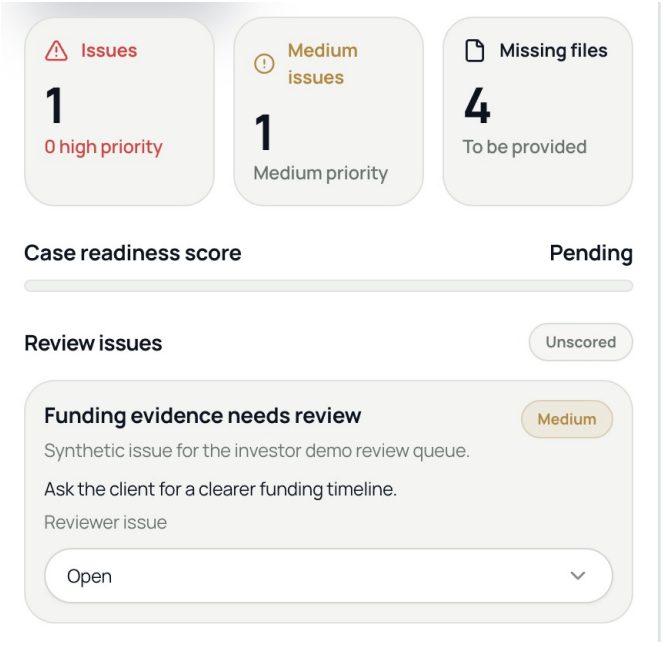

Prototype: checklist and issue review

Demo screens show required files and review decisions within a client case.

Document checklist

Issue review

How Vidicy differs

Document checks stay connected to the agency's case review and correction process.

Manual review

Staff check each document and record issues by hand.

General document chat

Users ask questions about uploaded files.

Vidicy

Route checklist, case files, reviewer decisions and client corrections stay together.

The reviewer controls the final issue list and client report.

Google Cloud architecture

Next.js on Cloud Run; Gemini models on Vertex AI.

Gemini extracts document text

Gemini 3.8 Flash runs on Vertex AI. OpenAI provides an extraction fallback.

The extraction prompt asks the model to preserve names, dates and wording. It also asks the model to flag unclear text before the application checks.

Four conditional agency pilots

Commitments depend on delivery of the agency workflow.

$45k

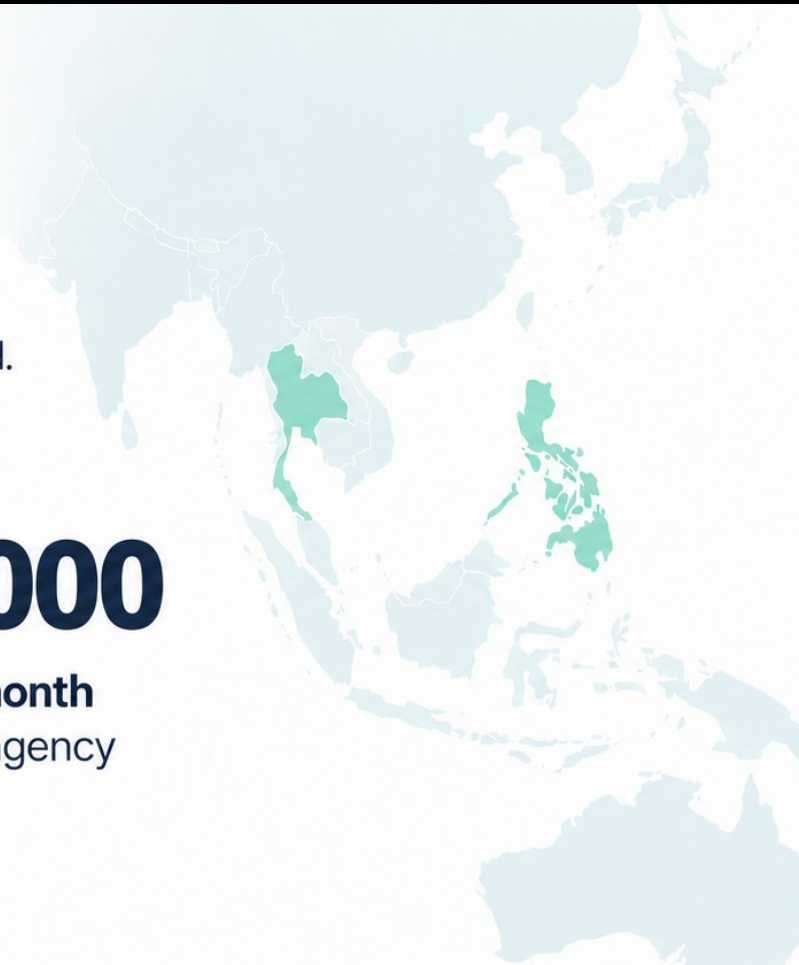

annual value of conditional pilot commitments

3 agencies at **$10,000/year**

1 agency at **$15,000/year**

Annual subscriptions for visa agencies

The first interested agencies were in the Philippines and Thailand.
We will start with agencies serving outbound travelers in Asia.

$10k

proposed starting price per agency, per year

500–2,000

applications per month
at a midsize target agency

Pilot measurement plan

Compare manual review with Vidicy using the same cases and reviewers.

Metric	Measurement
Review time	Minutes per case
Issue precision	Correct flags / all flags
Issue recall	Issues found / all labelled issues
Processing time	Median / 95th percentile
AI cost per case	All model calls, including retries

Pilot plan and next steps

Agency reviewers will evaluate the workflow. Their feedback will guide the product changes.

01 → 02 → 03

Measure results

Measure accuracy, review time and cost.

Improve checks

Use reviewer feedback to reduce false flags.

Add integrations

Process larger batches. Connect agency tools.

Team and experience

Taki Tajwaruzzaman Khan

Team lead

CEO, Klyne Labs, LLC

Built ShareTrip's visa application processing pipeline.

Former Tech Lead at MSOL digital, Tokyo, Japan.

Tanjim Ashraf

Team member

Business Development Manager at Pathao Limited, Bangladesh.

Experienced in strategic partnerships, business growth, and market expansion.
